

SoundKreations Residencies Ltd.

An Introduction to the company that puts the “chool” back in “school”!

SoundKreations Residencies Ltd. is an Alberta Non-Profit Company serving the Alberta Education System. We at SoundKreations pride ourselves in offering the most cutting edge residency programs in Alberta! We offer many exciting programs all designed to get the students excited about the dance, poetry, and music! SoundKreations currently specializes in the instruction of Hip-Hop and Safe Breakdance, Stomp Dance, African Dance, and SLAM! Poetry.

Our commitment at SoundKreations Inc. is to give others, at an early age, the opportunity to explore life through the eyes of an artist and to always create residency programs that empower Alberta’s students through the content they connect with. We have many objectives at SoundKreations but our main goal is to expose students to the creative process through a contemporary doorway that they can relate to and get excited about... basically we let the youth of Alberta know just how COOL dance and poetry really are!

Company Information

SoundKreations programs are designed for grades K-12 and the curriculum we employ changes with each grade level. Our programs run for a minimum of one day up to a maximum of 30 days. Our programs involve the active participation of all students within a given school and to date we have led over 50,000 Alberta students at over 100 different schools through our residency adventures. The program content is delivered in a class format and involves student demonstrations and performances.

Program Evolution

Our programs have many levels and dimensions available to schools wishing to explore its bounds and are all designed to build upon themselves with each program year. These programs are designed to transfer tools of exploration and introduce a new way of approaching the arts and the creative process.

Professional Development

We at SoundKreations firmly believe that our programs should never end on the day our instructors leave the school and thus we strive to include a Professional Development component with each program, designed to give the school’s staff the tools necessary to not only nurture the student’s progress in the creative process but their own.
